WE GO FAR BEYOND project is an elaboration of the project **WE CAME FROM BEYOND** (15-23 November 2007, STARTER Gallery, Poznań). Artists from **WCFB** had to use their experience from outside realizations in public space and build new, cohesive ecosystem in deserted flat the seat of STARTER association. What came to being was the realization in which artist's personal experiences mixed with skilful lecture of gallery space. Artists brought to light potential stories of this concrete flat. **WE GO FAR BEYOND** will go in other direction, beyond known convention where in the same time it will explore an autonomous needs of visionary creation.

WE GO FAR BEYOND won't be an exhibition in classical sense of meaning. There won't be any varnishing-day, there won't be set time limit of visiting. There won't be one stated place for the projects, the public will be accidental (no one from the audience will know that he is dealing with **WGFB** project). Invited artists have unlimited space and time for realizing their ideas, the only assumption here is an effort to raise a justification for every element of the project. If some project will assume the audience appearance it has to have a reason.

If **WCFB** was the project touching concrete space and its reading possibility, the **WGFB** doesn't envisage any special place; it is rather an attempt to create a new one - creative formation of reality, where project's validity doesn't have to manifest itself in the influence on anybody. If **WCFB** was an explosion of ideas in small space and short time (although explosion rather blows up), **WGFB** will be an implosion in huge space, extended in time. **WGFB** project will treat of a space, but of undefined location, of space annexing by co producers of the project. The book describing and summarizing both projects will come out in September 2008.

Honza Zamojski
curator WGFB

***WGFB** projects will be taking place during all June 2008, in various venues in Poland, mostly in Poznan. There won't be any varnishing - day, the time and place of project's realizations won't be announced in public.
